

Linear Shelving

The Linear shelving is an extension of the Linear Two Tier table range with magnetic side and back panels. These panels can be placed and removed with ease as they are held in place by discreet magnets that attach to and are also hidden by the vertical metal uprights. This allows the customer to have some input into the aesthetic and function of their shelving by using as many or few of these pieces as desired.

CARE/CLEANING INSTRUCTIONS

Feet are adjustable for levelling. Side and Back panels are magnetic. Customer can choose position on each unit. Clean with a soft damp cloth and water only. Do not use chemical cleaners on any surfaces. Avoid leaving water sitting on the wood as this can cause small spots and permanent marks - wipe immediately with a dry cloth. Wipe the lacquered surface using straight strokes not in a circular direction. After wiping the area use a dry cloth to remove any moisture left on the surface. General care: We do not recommend placing your furniture in direct sunlight or near sources of heat. This is due to the natural characteristics of wood as it expands and contracts with changes in humidity. Placing your furniture in these environments may cause the timber to dry out; shrink and crack. Do not place hot or sharp objects on the surface of the wood as this can cause irreparable damage. Also avoid using any harsh solvents such as nail polish remover/alcohol at all times
