

CITTÀ

arc full length mirror

product information document

The Arc Full Length Mirror is equal parts practical and beautiful, doubling as a statement piece of furniture with its elegant and modern design. It features a full arc at the top, softly rounded edges, and a square bottom. Made with laminated American oak with a clear matte lacquer. All elements of the design are carefully considered with two discreet keyhole mounting brackets allowing the mirror to sit virtually flush against the wall. Designed in our Auckland studio by David Moreland and Nikolai Sorensen.
