CITTÀ

compound bedside cabinet

All elements of the Compound Bedside Cabinet work together in harmony to provide an elegant storage solution with two generously sized drawers. Narrow shut-lines and push-to-open mechanisms give the bedside cabinet a minimal, elegant aesthetic. The legs are made with solid American white oak. The body, doors and drawers are made with a combination of veneer and solid-edged board. Hettich drawer-runners allow you to access items with ease. Designed in our New Zealand studio by David Moreland and Nikolai Sorensen.

CARE INSTRUCTIONS

Clean with a soft damp cloth and water only. Do not use chemical cleaners on any surfaces. Avoid leaving water sitting on the wood as this can cause small spots and permanent marks - wipe immediately with a dry cloth. Wipe the lacquered surface using straight strokes not in a circular direction. After wiping the area use a dry cloth to remove any moisture left on the surface. General care: We do not recommend placing your furniture in direct sunlight or near sources of heat. This is due to the natural characteristics of wood as it expands and contracts with changes in humidity. Placing your furniture in these environments may cause the timber to dry out; shrink and crack. Do not place hot or sharp objects on the surface of the wood as this can cause irreparable damage. Also avoid using any harsh solvents such as nail polish remover/alcohol at all times.
