Pin Table Lamp

Product Information Document

The Pin table lamp's contemporary aesthetic is punctuated by its clean silhouette and vibrant colour options. Its playful design is reminiscent of drawing pins, commonly found on noticeboards, a reference echoed in the palette of rich tones. For versatility, the Pin range also includes more subtle, understated hues.

The design is intentionally pared back, focusing on essential elements to create a clean, graphic form. The half-dome shade is paired with a layered, laser-cut steel base. The cable is discreetly routed through its pole to a colour-matched braided cord with an in-line switch.

A soft, downward pool of light is cast from the white inner shade, creating a warm, atmospheric glow. The light features a dimmable in line switch to easily adjust the SBLED bulb's brightness.

Designed in New Zealand by David Moreland and Nikolai Sorensen.
