## Pin Table Lamp

---

### Product Information Document

The Pin table lamp's playful aesthetic is reminiscent of drawing pins, a reference echoed in the palette of rich tones. For versatility, the range also includes more subtle, understated hues.

The design is intentionally pared back, focusing on essential elements. The half-dome shade is paired with a layered, laser-cut steel base. The cable is discreetly routed through its pole to a colour-matched braided cord with an in-line switch. A soft, downward pool of light is cast from the white inner shade. The switch features a dial dimmer for easy adjustment of the LED bulb's brightness. Designed in New Zealand by David Moreland and Nikolai Sorensen.
